PROFILE

I am a creative problem-solver who enjoys learning new languages, frameworks and all things design. What drives me to be a better programmer is the ability to showcase my creativity through code, and its capacity to create positive experiences for its users. Having shifted from a professional background consisting of Health & Nutrition, Marketing & Research, and Early Childhood Education, I understand the importance of compassion and humility. I am passionate about making a difference in the lives of all people through technology and its endless possibilities, and very excited to work with like-minded people who are always up for a challenge.

PROJECTS

CORGI
HTTPS://IMMENSE-RIDGE-13339.HEROKUAPP.COM/
- Corgi App is a C2C marketplace website designed with Ruby on Rails.
- Developing this app increased my knowledge on the separation of view logic and system logic using the MVC framework.
- This app also allowed me to further explore cloud hosting with AWS and Heroku; along with database management using PostgreSQL.

PERSONAL PORTFOLIO
HTTPS://MODEST-CRAY-86F927.NETLIFY.APP/
- Created a Personal Portfolio using the tech stack HTML & CSS.
- This website allowed me to further explore UI and UX designs and delve deeper into the client-side of development.
- This website uses multiple functions including animations and hover effects to add intrigue to the minimal design layout. Another branch is also included for a dark-mode setting.
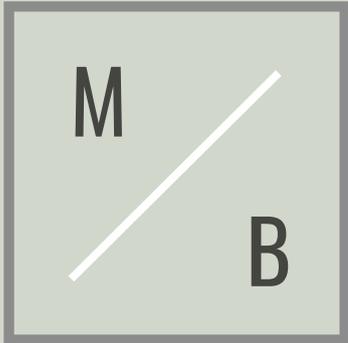

MY HEALTH APP
HTTPS://GITHUB.COM/MIA-BRUNNER/ASSIGNMENT-1
- My Health App is a terminal application using Ruby.
- Building this app allowed me to delve into the Ruby model and learn more about Ruby Syntax.
- Its main function is to generate calculations of the users Body Mass Index, Total Estimated Energy Intake and Estimated Macro-nutrient Intake based on a users age, height, weight, gender and physical activity level.

TECHNICAL SKILLS

- JavaScript
- MERN Stack
- Ruby
- Ruby on Rails

- HTML
- CSS
- GIT/GITHUB
- Agile Methodology
